|----------------------|--------------|
| 1) Jordan D'souza | PID : 193014 |
| 2) Aditya Ghadge | PID : 193022 |
| 3) Shrirang S. Joshi | PID : 193037 |

Understanding :

We understand the basic Java concepts, creating Front end in HTML using SpringBoot Framework. How to make real life projects in IT industry, Java backend development using SpringBoot Framework now we are familiar with this. We understand how to maintain GitHub repositories and current industry patterns. And lastly by doing project we applied all the things which we learned in 3 days of workshop. We gained a knowledge about Java, API's, postman software, GitHub, HTML, CSS, etc.

That's how 3 days workshop helped us in learning and gaining experience about projects.

Take away Points :

- 1) Use of SpringBoot Framework in Java, HTML, CSS, Java Backend development.
- 2) Use of softwares like GitHub, GitBucket, Postman
- 3) How to upload information on server, designing of HTML via CSS, handling project errors.
- 4) Use of GitHub repository and command in it for uploading our project.
